## DISTRIBUTION

EX1	X	X							
STATE	WAR	NAVY	JUSTICE						

1. Bowag\* is to reinstall the large third turbine in the Klingenberg Power Station, which will, thereby, reach its pre-war capacity.
2. A new process has been evolved whereby flue ash can be used for the manufacture of tiles and bricks. The capital outlay for equipment is not great. This type of tile and brick is extremely light and possesses a high insulation value.
